TESTIMONIAL

During my service with Tamilnadu Petroproducts Ltd. from 1985 through 1996 in various capacities and finally as its Managing Director, I had the opportunity to meet and engage the services of MANJULA RAO for development of three Traffic Islands in the most prestigious locations in the city of Madras as one of the Corporate objectives to help the local Government in developing greenery.

Besides transforming the Traffic Islands into a Land Mark Gardens with testefully developed lighting and fountains, Manjula Rao helped the Company get every year outstanding Traffic Island Trophies from the Corporation of Madras. This was possible only due to the excellent professional skill and commitment to complete the projects taken up without cost over runs and adhering time schedule of Manjula Rao who had several corporate houses amongst her clientele.

With her sincerity, hard work and devotion to duty, I am sure Manjula Rao will be a person to reckon with in development of Landscape in USA – the land of opportunity.

Wish her all success in her career development.
